Preface

This publication contains the Commodity List for external trade statistics. It will be enclosed the publication External Trade, and the January issue of the Monthly Bulletin of External Trade. The Commodity List follows the nomenclature of the Norwegian Customs Tariff, as from 1988 based on the combined tariff/statistical nomenclature, the Harmonized System (HS).

The Commodity List is prepared by Division for Manufacturing and External Trade Statistics. Responsible head of division is Bjørn Bleskestad.

1. Purpose

The purpose of the external trade statistics is to give information about the commodity flows between Norway and other countries. The statistics intend, as far as possible, to meet the demands from industry or trade for data in their planning of production, sales and marketing activities. In addition, the statistics make an important part of the data basis for prognoses and analyses performed by private organizations, public authorities, research institutions etc. International organizations, like UNs Statistical Office, and others, make an extensive use of information from the external trade data, as supplied by the individual countries. The statistics form integrating parts of the national and international statistical systems and are also utilized for the preparing of national accounts and balance of payment statistics. Accordingly, internationally adopted definitions as well as standards of commodity and country classifications are of great importance.

2. The source material

The external trade statistics are based on information collected by the customs authorities in conjunction with imports and exports of goods. For the preparation of the data, Statistics Norway receives copies of the commodity declarations forms from the Customs, filled in by importers and exporters, respectively. Information on imports and exports of special equipment, i.e. ships, electric current and imports or exports falling outside the Customs' area, like equipment imported directly to the Norwegian part of the continental shelf or crude oil and natural gas, exported by pipeline from the shelf, are based on special reports. Complete figures for imports directly to the Norwegian part of the continental shelf are only available as estimates in the balance of payment statistics. The Norwegian Petroleum Directorate reports monthly the quantity of oil exported from the oil fields in the North Sea. The same authority monthly also submits reports on the quantities of gas exported by pipeline.

3. Coverage

The coverage of the statistics is mainly in accordance with the recommendations of the United Nations Statistical Commission and relates to the general trade principle. The difference between the special trade and the general trade mainly consists of different recording of goods passing through bonded warehouses. Direct imports are recorded at the time of customs clearance. Goods coming through bond-ed warehouses are recorded as imports when they enter these warehouses, as exports when they are sold abroad from the warehouses. According to the special trade, however, imports are re-corded in the statistics when the goods are cleared by the customs, whereas re-exports from the warehouses would be excluded from the export statistics. The statistical area of Norway includes the Norwegian part of the continental shelf, Svalbard and Jan Mayen with Bjørnøya. Commodities with a value less than 1 000 kroner are not included in the statistics.

Excluded from the statistics are i.e. direct transit trade, consignments of limited values, goods and equipment for temporary use, returned merchandise, repair trade, personal luggage and belongings and supplies under military defence agreements. For further details, see the publication External Trade.

4. Definitions

4.1. Commodity classifications

As from 1988 the commodities are grouped according to The Harmonized Commodity Description and Coding System (HS), a six digits combined statistical/tariff nomenclature. The international codes are in Norway expanded with two digits for national purposes. The Norwegian Commodity list valid as from 1994, specifies about 6 400 commodities by eight digit codes. From 1988 United Nations Standard International Trade Classification, Rev. 3, is also introduced. This is a classification of 3 100 commodity items directly linked to the Harmonized System. Statistics Norway prepares publications based on HS as well as SITC, Rev. 3.

4.2. Quantities

Net weight is used in the tables except for imported goods where the duty is calculated according to the Customs Tariff of the weight of the goods including their packings (for example canned goods). The Commodity List also shows the commodity items which in addition to kilogrammes are registered in other quantity units.

4.3. Valuation

The value of the imports represents the c.i.f. value, and the value of the exports represents the f.o.b. value at Norwegian port or land boundary, eventually at the statistical "border". The value of oil produced on the Norwegian part of the continental shelf and further exported is calculated from Customs' declarations and norm prices determined administratively and adjusted for the transport and terminal costs. The export value of natural gas is based on data found in the official import statistics of the partner countries and other published reports.

4.4. Geographical classification

In all tables with country distribution imported commodities are grouped by country of origin (production) and exported commodities by country of destination.

The following definitions are used: Country of origin (production) is for crude materials defined as the country in which the goods are produced, and for manufactured goods, including refined products, as the country of final processing, not counting re-packing, sorting and blending (except blending of tea).

Country of consignment is defined as the country from which the goods are shipped to Norway without any commercial transaction intervening (transhipment not counting).

Country of destination is defined as the country which at the time of exportation is the last known country to which the goods are shipped, directly or through other countries, without any commercial transaction intervening (transhipment not counting).

The country code follows mainly the ISO (International Organization for Standardization) alpha code. In 1987 and in the previous years, a three digit code was used.

# **Statistics on External Trade**

Subscription to Monthly Bulletin of External Trade may be ordered from Statistics Norway, Skippergata 15, Oslo-Dep, 0033 Oslo, or in bookstores. Single volumes are available at the same places. After 1 March 1994 the address to Statistics Norway will be Kongensgate 6, Oslo-Dep, 0033 Oslo.

Statistics Norway also issues the annual publication EXTERNAL TRADE, which presents figures for imports and exports by commodity and by principal countries, and also by country and principal commodities.

The commodities are grouped according to the detailed Commodity List for External Trade Statistics. EXTERNAL TRADE is published by Academica-department for official publications, Oslo, and can be bought in bookstores. Information on trade by country and commodity groups according to UNs Standard International Trade Classification (SITC) is published in two annual volumes (Volume 1 and 2). The tables in these two publications are almost identical to those in the previous NOS-publication, EXTERNAL TRADE, Volume II, and are available at The Section for Manufacturing and External Trade.

# Special Reports on Norwegian External Trade by Custom Commodity Numbers (Valid from January 1994)

Special reports on Norwegian external trade may be obtained on a regular basis by subscription or as single reports. Layout media available are paper printouts (37,5-40 cm wide), tape, tape cassets, or diskettes (5 1/4" or 3 1/2"). Data is released within 30 days after the end of reported month.

Special reports should be ordered in writing to:

Statistics Norway; External Trade; Postbox 8133 Dep, N-0033 Oslo. Visitor's address of our customer service is Skippergata 15. After 1 March 1994 the address is Kongensgate 6.

Typical subscription terms are listed below. When ordering other reports, kindly contact our customer service (open 08.30-14.30), direct phone extensions 22 86 47 52 and 22 86 47 53. Telefax number is 22 42 14 68 or 22 86 49 73.

#### SUBSCRIPTION TERMS, COMMODITY LISTS. Reports on yearly accumulates as from January.

The commodity lists show figures for reporting month and accumulated figures from January. Orders should specify single commodity numbers identical to those used in the Norwegian Custom Tariff which is based on the international Harmonized System supplemented with a 2 digits national extension. The national tariff is available at the INTERNATIONAL CUSTOMS TARIFFS BUREAU, Rue de L'Association 38, B-1000 Brussels or at our customer service. When ordering please state your data requirements:

- imports, exports or both
- if specification by country is requested
- if quantities specified by place of clearance is requested

Yearly subscription rate is calculated by adding 2 and 3 below.
